

Full Fee Mileage Guidelines

Idaho Transportation Department

When applying for registration for Full Fee power units over 60,000 pounds combined gross vehicle weight, you must show actual Idaho mileage for the previous July 1 through June 30 mileage period, unless no Idaho miles were traveled during that period. If no Idaho miles were traveled, mileage may be estimated based on the options below.

Instructions for Completing this Form:

Fill in your account number and the registration year below. Then, select the estimated mileage option of your choice for each unit. Write the mileage estimate for each unit on the Full Fee Application for Registration. **If the mileage estimate for any unit is 7,500 or less, include this form with your application.**

Commercial Vehicle Services Account Number:	Registration Year:
---	--------------------

☐ **Option 1:** For unit(s):

You may use a mileage estimate of 7,501 miles (fee tier 2) or higher without explanation. The standard mileage estimate is 11,000, which is the average annual mileage operated per Full Fee vehicle in Idaho.

☐ **Option 2:**

Complete the table below, estimating your projected trips and mileage for a 12-month period for each vehicle. You may make copies of this form for additional vehicles.

Vehicle Unit #	Trip Origin	Trip Destination	Number of Miles per Trip or Round Trip		Estimated Number of Trips per Year		Total Miles	Total Estimate per Vehicle
				X		=		
				X		=		
				X		=		
				X		=		
				X		=		
				X		=		

☐ **Option 3:** For unit(s):

If a unit will be operating **primarily on local routes**, and you do not have any idea of the specific routes of travel, determine your own estimate of the number of miles to be traveled in a 12-month period.

☐ **Option 4:** For unit(s):

If a vehicle is operating in a similar manner as another vehicle, mileage that is comparable to the other vehicle's mileage over a 12-month period may be estimated. Include an explanation below if you choose this option.

Explanation for Option 4:
